WEGROWEEN

# Design Direction Manual

Cultivated Editorial - a premium, harvest-aware identity and web design system for households, with restaurant supply available.

**VERSION**

1.2.0-proposed
02 October 2026

**DECISION OWNER**

Design Decision Leader: User
Mode: REFRESH

**SCOPE**

Identity, foundations, icons, components and homepage direction. No application build.

# The approved system.

Premium is demonstrated through operational truth, sensory specificity and disciplined editorial hierarchy – not generic luxury language.

**Positioning**

WeGroween is a premium, harvest-aware food brand making microgreens, mushrooms, organic fruit and vegetables, and unusual farm products easier to trust and buy for the home. Restaurant supply is a visible secondary path.

Approved

## Cultivated Editorial

A refined food journal with the clarity and state discipline of dependable commerce.

- Emotional objective: cultivated confidence
- Visual behavior: warm, tactile, precise
- Commerce behavior: explicit and efficient

## Canonical identifiers

| | | | |
|---|---|---|---|
| **VOICE** | V1 Cultivated Authority | **PALETTE** | C2 Soil & Saffron |
| **TYPE** | T2 Fraunces + DM Sans | **GRID** | G3 Curated Market |
| **MOTION** | M1 Restrained Editorial | **ICONS** | I1 Field Notes |

**Show the harvest**

Availability, variety, unit, harvest timing and delivery context stay close to purchase actions.

**Earn premium**

Use cultivation evidence, careful typography and original imagery rather than ornamental signals.

**Respect reality**

Biological variability is explained through Growing, Harvesting, Ready, Limited and Resting states.

**Prototype palette exception**

The Phase 7 homepage prototype uses Color Approach #1, C1 Orchard Ink, because the governing delivery contract requires Approach #1. This does not replace the leader-approved canonical C2 Soil & Saffron system.

# Business, audience and conversion context.

Households lead the experience. Professional kitchens receive a deliberate service path without turning the brand into a wholesale portal.

## Business context

- Products: microgreens, mushrooms, organic fruit and vegetables, and exotic farm products
- Model: premium household commerce with restaurant supply available
- Brand name meaning: WeGroween combines "we grow green"
- Future commerce context: online ordering, admin order handling, Supabase and Razorpay

## Primary conversion

- Browse what is actually ready
- Check serviceability early
- Understand pack size, timing and use
- Add to basket or reserve a harvest
- Contact restaurant supply with meaningful requirements

### Primary audience

Quality-conscious households who want distinctive produce, credible freshness and cooking relevance.

### Secondary audience

Restaurants, cafes and chefs who need availability, pack size, supply continuity and human support.

### Future operators

Staff who require accurate products, claims, inventory, orders, delivery and customer information.

## Attributes and anti-attributes

DECISION FILTER

| Build | Avoid | Practical test |
|---|---|---|
| Premium through specificity | Luxury adjectives without proof | Can a shopper see why this item is different? |
| Authentic cultivation | Anonymous eco claims | Can every growing claim be tied to a real record? |
| Warm authority | Rustic craft-market styling | Does the interface remain precise and operational? |
| Editorial curation | Commodity grocery clutter | Does each module help a user choose or trust? |
| Household-first clarity | B2B language in the hero | Can a first-time home shopper act immediately? |

### Scope boundary

This package defines the design system and prototype direction. It does not implement storefront, checkout, database, payment, authentication or admin workflows.

# Patterns were researched, not pages to copy.

Market evidence, current project assets, accessibility guidance and local resources were normalized with source, access date, confidence and limitation fields.

## Research method

- Audited the current WeGroween static catalogue and assets
- Reviewed current direct and adjacent food-commerce references
- Examined accessibility, food-commerce and implementation guidance
- Inspected approved local visual resources on the E: drive
- Separated observed facts, interpretation and original hypotheses

## Evidence limits

- No production analytics or customer interviews
- Service areas, slot rules and operating capacity remain unknown
- Product catalogue, pack data and claims are not final
- Local stock resources have uncertain reuse rights
- Compliance requires qualified legal and accounting review

### Trust is operational

Source, availability, delivery, substitutions, refunds and support create more confidence than badges alone.

### Freshness needs states

Harvest dates and next availability convert biological variability into useful expectations.

### Repeat shopping matters

Buy-again and saved lists should reduce effort when the application phase begins.

### Perishables reshape checkout

Serviceability, slots and stock risk must appear before payment.

### Restaurants need another mode

Reorder speed, pack sizes, GST data and support matter more than lifestyle storytelling.

### Breadth needs curation

Variety, uses, recipes and cultivation prevent a broad catalogue from feeling generic.

**Originality rule**

References support transferable patterns only. Do not reproduce a competitor's wording, logo, photography, illustration or distinctive composition.

# Three distinct futures were considered.

Cultivated Editorial was selected because it best balances premium household emotion, unusual produce and operational credibility.

Selected

## Cultivated Editorial

A refined food journal with a dependable commerce core.

- Warm mineral canvas
- Expressive serif restraint
- Product and cultivation evidence
- Compact market density
- Low-decoration motion

**Risk:** requires disciplined photography and copy.

Alternative

## Living Laboratory

A precise growing system centered on traceability and batch intelligence.

- Cooler technical surfaces
- Structured data and diagrams
- Strong restaurant credibility
- Exacting operational language

**Risk:** can feel clinical for households.

Alternative

## Seasonal Table

A generous, meal-led world organized around cooking and abundance.

- Warm food moments
- Recipe-led navigation
- Approachable household voice
- Seasonal visual rotation

**Risk:** can dilute specialist authority.

## Approved territory behavior

CULTIVATED EDITORIAL

| Dimension | Direction | Guardrail |
|---|---|---|
| Emotion | Cultivated confidence and appetite | Never aloof, precious or theatrical |
| Color | Earth-derived anchors with controlled seasonal accents | Avoid monochrome eco-green and festive saturation |
| Typography | Editorial display voice plus compact readable UI | Serif does not enter dense transactional controls |
| Shape | Restrained 8-14px radii, crisp rules | No glassy bento-card trend stacking |
| Depth | Surface shifts and borders first | Shadows reserved for actual elevation |
| Motion | Purposeful state and continuity feedback | No decorative parallax requirement |

# Cultivated confidence, made actionable.

The brand should feel like a trusted grower, discerning food editor and reliable local supplier speaking with one voice.

## Theme and vibe

Premium, authentic, grounded, sensory, precise, seasonal and quietly distinctive.

**Visual keywords**

harvest ledger, mineral paper, cultivated detail, precise abundance, quiet rule, tactile edge

**Emotional objective**

Make the customer feel informed, invited and confident that the product will justify a premium.

## Brand promise

We show what is growing, what is ready and why it is worth bringing to your table.

Working expression – not a locked tagline

## Principles and anti-principles

GOVERN EVERY TOUCHPOINT

- ✓ Specific product names and varieties
- ✓ Visible units, timing and delivery context
- ✓ Verifiable cultivation language
- ✓ Sensory copy with practical meaning
- ✓ One obvious primary action
- ✓ Status communicated in words

### Do not

- Use detox, miracle, guilt-free or superfood claims without evidence
- Imply certification, organic status or health outcomes not documented
- Use fake dew, hyper-saturation or anonymous farm imagery
- Hide unavailable products without explaining the harvest state
- Turn every surface into a rounded floating card
- Use the deferred wordmark as if it were approved

**Deferred identity work**

Wordmark, logo, monogram and lockup direction remain outside this release. I1 Field Notes must remain usable without dependence on a final logo proportion.

# V1 Cultivated Authority.

Precise, sensory, warm and transparent. Short confident headings pair with plain operational language.

**Precise**

Name the variety, pack, harvest state, source and expected timing.

**Sensory**

Describe flavour, texture and use without turning every line into poetry.

**Transparent**

Explain availability limits, substitutions and recovery clearly.

## Sentence behavior

- Headings: short, specific and active
- Body: calm, direct and evidence-led
- Product names: exact and scannable
- CTAs: verb plus outcome
- Error copy: state what happened, what remains safe and what to do next
- Restaurant copy: operational without losing warmth

## Vocabulary

| Prefer | Avoid |
|---|---|
| cultivated, harvested, seasonal | world-class, revolutionary |
| variety, flavour, source | miracle, detox, supercharge |
| ready, growing, resting | always fresh, guaranteed perfect |
| kitchen, batch, dispatch | chemical-free without proof |

## Applied examples

VOICE IN USE

| Context | Use | Avoid |
|---|---|---|
| Hero | Grown with care. Chosen for flavour. | India's most revolutionary organic superfoods. |
| Availability | This bed is resting. Join the next harvest list. | Sold out. |
| Product | Blue-grey oyster. Silken texture, savoury depth. | Premium exotic mushroom. |
| Delivery | Enter your pincode to see the next delivery window. | Fast delivery everywhere. |
| Error | Payment was not confirmed. Your basket is safe. | Something went wrong. |
| Restaurant CTA | Request kitchen supply. | Unlock B2B synergies. |

# Three complete approaches.

C2 is canonical. C1 is mandatory only for the Phase 7 homepage prototype. Alternatives remain decision history and should not be mixed into implementation.

Prototype #1

## C1 Orchard Ink

Botanical ink, blackberry and harvest gold. Calm, discerning and produce-led.

#223225 #7D3F54 #C89538

**Risk:** can suggest wine or cosmetics without fresh produce context.

Canonical

## C2 Soil & Saffron

Deep soil, terracotta and saffron. Warm, Indian and appetizing.

#402B24 #98513D #D49A25

**Risk:** can become rustic or festive if accents compete.

Alternative

## C3 Plum & Leaf

Deep plum, cultivated olive and ripe red. Boutique and sensorial.

#402238 #50633B #B54836

**Risk:** may resemble beauty or hospitality.

## Shared color rules

ACCESSIBILITY FIRST

- ✓ Normal text pairs meet at least 4.5:1
- ✓ Large text and meaningful boundaries meet at least 3:1
- ✓ Status always includes text or an equivalent cue
- ✓ Accent colors are not default small-text backgrounds
- ✓ Focus stays evergreen and clearly visible
- ✓ Disabled colors are never used for required active content
- ✓ Seasonal extensions require contrast measurement
- ✓ Do not mix palette identifiers inside one interface

**Source of truth**

`design-tokens.json` stores C2 canonical values. C1 and C3 remain documented alternatives; the homepage prototype has its own clearly labelled C1 presentation layer.

PROTOTYPE ONLY

# C1 Orchard Ink.

Mandatory homepage prototype palette. It is not the canonical production selection.

| Primary | Secondary | Accent | Background | Surface | Elevated |
|---|---|---|---|---|---|
| #223225 | #7D3F54 | #C89538 | #F5F0E6 | #FFFCF5 | #FFFFFF |

| Semantic role | Value |
|---|---|
| text-primary | #1E251D |
| text-secondary | #53604F |
| text-inverse | #FFF9EE |
| border | #CED2C8 |
| border-strong | #7C8978 |
| focus | #006C5B |
| success | #226348 |
| warning | #995300 |
| error | #A52A3B |
| information | #245B78 |
| disabled-background | #E5E3DB |
| disabled-content | #6F746D |

| Required pair | Ratio | Result |
|---|---|---|
| text-primary / background | 13.82:1 | AAA |
| text-primary / surface | 15.32:1 | AAA |
| text-secondary / background | 5.86:1 | AA |
| text-inverse / primary | 12.92:1 | AAA |
| text-inverse / secondary | 7.39:1 | AAA |
| text-primary / accent | 5.84:1 | AA |
| focus / background | 5.61:1 | Pass UI |
| success / surface | 6.96:1 | AA |
| warning / surface | 5.71:1 | AA |
| error / surface | 6.84:1 | AA |
| information / surface | 7.21:1 | AAA |
| disabled pair | 3.72:1 | Inactive only |

### Use

Botanical Ink for anchors and primary actions. Blackberry below roughly 15% of a page. Harvest Gold behind dark text or as a non-text highlight.

### Avoid

Do not use white small text on Harvest Gold. Do not let Blackberry dominate product pages without produce-led context.

CANONICAL

# C2 Soil & Saffron.

The Design Decision Leader's approved production system.

Primary
#402B24

Secondary
#98513D

Accent
#D49A25

Background
#FBF4E8

Surface
#FFFDF7

Elevated
#FFFFFF

| Semantic role | Value |
|---|---|
| text-primary | #2B211D |
| text-secondary | #66544B |
| text-inverse | #FFF8EC |
| border | #DDD1C2 |
| border-strong | #92796C |
| focus | #006C5B |
| success | #2E654A |
| warning | #925100 |
| error | #A42C3B |
| information | #285C78 |
| disabled-background | #E9E2D7 |
| disabled-content | #74706A |

| Required pair | Ratio | Result |
|---|---|---|
| text-primary / background | 14.36:1 | AAA |
| text-primary / surface | 15.43:1 | AAA |
| text-secondary / background | 6.54:1 | AA |
| text-inverse / primary | 12.52:1 | AAA |
| text-inverse / secondary | 5.56:1 | AA |
| text-primary / accent | 6.31:1 | AA |
| focus / background | 5.83:1 | Pass UI |
| success / surface | 6.71:1 | AA |
| warning / surface | 6.07:1 | AA |
| error / surface | 6.88:1 | AA |
| information / surface | 7.14:1 | AAA |
| disabled pair | 3.82:1 | Inactive only |

### Use

Deep Soil anchors primary actions. Terracotta supports editorial emphasis. Saffron highlights price, timing or category detail with dark text.

### Avoid

Do not give Terracotta and Saffron equal weight. Avoid rustic craft motifs that reduce the precision-grown impression.

ALTERNATIVE

# C3 Plum & Leaf.

Retained for decision history, not implementation.

Primary
#402238

Secondary
#50633B

Accent
#B54836

Background
#F6F1E9

Surface
#FFFDF9

Elevated
#FFFFFF

| error / surface | 7.06:1 | AAA |
| information / surface | 7.00:1 | AAA |
| disabled pair | 4.04:1 | Inactive only |

### Use

Appropriate for premium gifting or editorial campaigns if formally reopened as a future direction.

### Avoid

Do not introduce Plum, Leaf or Ripe Red into C2 components. Dark text on the Ripe Red accent is not an approved normal-text pair.

# Editorial expression, operational clarity.

T2 Fraunces + DM Sans is canonical. Both options are open-license and self-hosted; pairings must never be mixed.

Selected T2

## Cultivated for flavour.

Fraunces brings tactile contemporary character. DM Sans keeps product grids, forms and operational content compact and friendly.

- Fraunces variable: display and H1-H3
- DM Sans variable: body, UI and H4-H6
- SIL Open Font License 1.1
- Self-host WOFF2 with font-display: swap
- Risk: excessive axes can feel trendy

Alternative T1

## Harvest notes for the table.

Newsreader + Manrope is calmer and more literary. It was recommended initially but not selected.

- Newsreader variable: display and H1-H3
- Manrope variable: body and UI
- SIL Open Font License 1.1
- Risk: can become overly literary

## Typography governance

SELECTED T2

**Display restraint**

Use moderate softness and stable axes. Do not vary Fraunces settings per component.

**Readable measure**

Paragraphs stop at 66ch; hero and product narratives stop at 54ch.

**Loading**

Preload roman display and body files; load italic only when used. Preserve OFL notices.

**Fallbacks**

Fraunces to Georgia to serif. DM Sans to Segoe UI to Arial to sans-serif.

**Dense UI**

Use DM Sans for tables, form labels, product names and admin navigation.

**Minimum body**

Body text never drops below 16px in implementation.

12 - SELECTED TYPE SCALE

# T2 modular hierarchy.

Every role includes family, size, line height, weight and tracking. CSS tokens remain the implementation reference.

| | | |
|---|---|---|
| DISPLAY | Harvested with intention. | clamp 3.4-5.75rem / .94 / 600 / -.05em |
| H1 | The current harvest. | clamp 2.7-4.25rem / .99 / 600 / -.04em |
| H2 | Know what is growing. | clamp 2.2-3.375rem / 1.04 / 600 / -.032em |
| H3 | For homes and kitchens. | clamp 1.75-2.375rem / 1.10 / 600 / -.022em |
| H4 | **Delivery before checkout** | 1.75rem / 1.20 / 600 / -.025em |
| H5 | **Blue-grey oyster** | 1.375rem / 1.28 / 700 / -.016em |
| H6 | **Harvest details** | 1.125rem / 1.35 / 700 / -.005em |
| LEAD | Distinctive produce, made easier to trust. | 1.25rem / 1.58 / 400 / -.012em |
| BODY | Show the variety, pack size, harvest timing and delivery context close to the action. | 1rem / 1.60 / 400 / -.008em |
| LABEL | READY THIS WEEK | .8125rem / 1.30 / 700 / .07em |
| CAPTION | Harvest Friday - delivery begins Saturday. | .75rem / 1.45 / 500 / .012em |
| CODE | `--color-brand-primary` | .8125rem / 1.50 / 500 / 0 |

**Hierarchy test**

A page should remain understandable when imagery is removed. Headings, labels, groups and actions must still expose the narrative and task order.

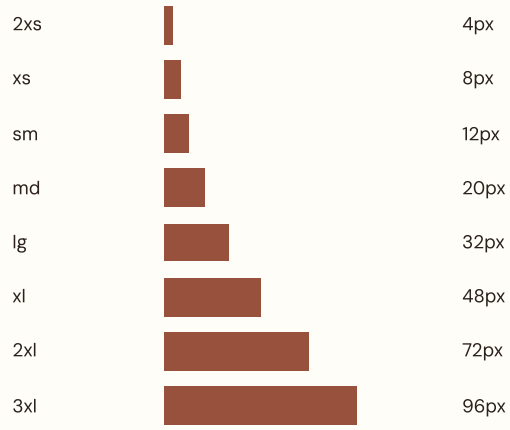

# G3 Curated Market with restrained depth.

A compact commerce rhythm is softened by strong typography, editorial section pacing and precise surface hierarchy.

## Grid and containers

| | |
|---|---|
| Content maximum | 1200px |
| Wide maximum | 1360px |
| Reading width | 660px / 66ch |
| Form width | 560px |
| Columns | 12 |
| Gutter | 16–20px |
| Page margins | 20 / 32 / 48px |
| Reflow references | 640 / 900 / 1200px |

## Spacing scale

### Radius

0 / 8 control / 10 card / 14 panel / pill / round. Do not invent local values.

### Depth

Flat, raised, floating, overlay and modal. Borders and surfaces carry hierarchy before shadows.

### Motion

140ms micro, 220ms standard, 360ms emphasized. Reduced motion removes translation and decorative reveals.

## Responsive rules

AVAILABLE SPACE, NOT DEVICE LABELS

- ✓ Product grids reflow from four to two to one column
- ✓ Inputs fill their available column; related short fields stay at least 160px
- ✓ Touch targets remain at least 44px
- ✓ Text expansion tolerance is at least 35%
- ✓ Prices, units, availability and actions are never truncated
- ✓ Media ratios: product 4:3, pack shot 1:1, editorial 5:4 or 4:5

# I1 Field Notes.

An original, crop-aware line system that adds cultivated character without compromising universal action recognition.

**24px grid**
16, 20, 24 and 32px rendered sizes

**1.75px stroke**
Optically consistent, not mechanically identical

**Square caps**
Rounded joins and open counters

**Current color**
Semantic meaning includes text

## Construction behavior

- Universal actions remain conventional
- Living subjects may use controlled asymmetry
- Icons reinforce labels rather than replace them
- Icon-only controls require accessible names
- Interactive icon targets remain at least 44x44px
- New glyphs must follow the documented generator rules

## Do not mix

- Rounded monoline families
- Bold bevelled commerce icons
- Filled glyphs with unrelated geometry
- Emoji as operational symbols
- Logo or monogram concepts before the deferred identity checkpoint

## Imagery direction

PRODUCTION REQUIRES VERIFIED RIGHTS

**Show**
Texture, scale, hands, cultivation, harvest and finished-food context.

**Avoid**
Fake dew, hyper-saturation, heavy green grading and anonymous laboratory imagery.

**Record**
Photographer, source, permission, crop guidance and approved use.

**Current specimen assets**

The inherited product images hash-match existing WeGroween project files, but production-reuse rights were not independently verified. They remain specimen-only until permission is documented.

# State-complete, framework-neutral contracts.

Components map approved tokens to semantic behavior. They are reference assets for future HTML and Tailwind implementation, not application code.

## Navigation

Current, scrolled, overflow, collapsed and expanded states.

**WeGroween** Harvest – Cultivation – Restaurants

## Buttons

Primary, secondary, tertiary, destructive, icon-only, loading and disabled.

Add to harvest | View details

## Inputs

Persistent labels with empty, filled, validating, success, error, disabled and read-only states.

Delivery pincode

Enter six-digit pincode

## Cards

Interactive, selected, loading, unavailable and error/recovery.

**Blue-grey oyster**

Rs 180 / 200 g

## Badges

Neutral, brand, success, warning, error and information with visible words.

Ready now | Harvest Friday

## Quantity and feedback

44px controls, live-status guidance and plain-language recovery.

– 1 +  Basket updated

## Component rules

NON-NEGOTIABLE

- ✓ Use native links, buttons and form controls
- ✓ Visible focus uses the canonical 3px ring
- ✓ Loading prevents repeated submission
- ✓ Placeholder text never replaces a label
- ✓ Whole-card links never swallow nested actions
- ✓ Status color always includes visible language
- ✓ Disabled and read-only remain distinguishable
- ✓ Every remote surface defines loading, empty, error, offline and unauthorized

16 – HOMEPAGE DIRECTION

# H1 Harvest to Home.

Approved by the Design Decision Leader with both design-delivery PDFs. Household conversion leads; restaurant supply remains visible and credible.

1. **Navigation and service cues**
   Shop categories, Restaurants, search/account/basket and a labelled mobile menu.
2. **Harvest-led hero**
   A specific value proposition, one primary action and a bounded 5:4 media placeholder.
3. **Trust strip**
   Harvest-aware availability, cultivation traceability and delivery clarity.
4. **Current harvest**
   Ready products with variety, pack, price, timing and action visible.
5. **Serviceability**
   Pincode check before a shopper invests in a perishable basket.
6. **Cultivation evidence**
   Growing method, harvest timing, storage and best-use guidance.
7. **Delivery process**
   Three concise steps from serviceability to doorstep.
8. **Restaurant supply**
   Kitchen packs, current list and an enquiry path after household proof.
9. **Journal or recipes**
   Seasonal content that helps customers use what they buy.
10. **Footer and policies**
    Delivery, returns, contact, food-business details and governance links.

### Conversion logic

Show the current harvest before asking the visitor to study the brand story.

### Trust strategy

Place cultivation and delivery evidence near the moment it affects choice.

### Content burden

Requires accurate product, availability, cultivation, delivery and restaurant information.

**Prototype rules**

Uses C1 Orchard Ink as mandatory Color Approach #1, T2 Fraunces + DM Sans and G3 Curated Market. All photograph, illustration, video and rich-media regions remain empty bounded placeholders.

# WCAG 2.2 AA is the target.

Automated contrast and structural checks support the target; they do not replace implemented-product testing.

## Accessibility baseline

- ✓ Semantic HTML before ARIA
- ✓ Visible persistent labels
- ✓ 3px focus ring with at least 3:1 adjacent contrast
- ✓ Required text pairs at least 4.5:1
- ✓ 44px preferred touch targets
- ✓ Reduced-motion path
- ✓ Status updates announced programmatically
- ✓ 320px reflow and 200–400% zoom testing

## Content resilience

- ✓ At least 35% text expansion tolerance
- ✓ No forced line breaks in customer copy
- ✓ Prices, units and status never truncated
- ✓ Product names may wrap to two lines
- ✓ Errors explain recovery in plain language
- ✓ Images receive useful alt text or empty alt when decorative
- ✓ Critical information remains outside transient toasts

## Measured C2 contrast

SELECTED SYSTEM

| Pair | Ratio | Purpose |
|---|---|---|
| text-primary / background | 14.36:1 | Primary reading |
| text-secondary / background | 6.54:1 | Supporting reading |
| text-inverse / primary | 12.52:1 | Primary buttons and dark fields |
| text-inverse / secondary | 5.56:1 | Terracotta fields |
| focus / background | 5.83:1 | Focus and meaningful UI |
| error / surface | 6.88:1 | Error text and icons |

**Manual checks still required**

Keyboard sequence, focus return, screen-reader announcements, high-contrast mode, zoom/reflow and physical touch behavior must be verified in the implemented product. This manual is not an accessibility certification.

# Tokens first. Semantics always.

The system is framework-neutral today and can map to future semantic HTML, compiled Tailwind CSS, modular JavaScript, Supabase and Razorpay.

## Developer handoff

- Import `tokens.css` before component styles
- Map Tailwind utilities to CSS variables; never duplicate palette hex values
- Use `wg-` reference classes or equivalent semantic component APIs
- Use data attributes for behavior, not styling hooks
- Keep Supabase service-role and Razorpay secrets server-side
- Verify payment signatures and process idempotent webhooks
- Protect exposed tables with deliberate RLS policies and grants

## Designer handoff

- Use C2 and T2 as canonical
- Keep G3 density while preserving editorial hierarchy
- Extend I1 icons through the documented construction rules
- Do not approve photography without source and rights records
- Preserve explicit availability, delivery and recovery states
- Do not revive rejected palette or type options without a new decision
- Keep wordmark and logo work deferred

## Decision and release status

02 OCTOBER 2026

| Decision | Status | Owner |
|---|---|---|
| Creative territory – Cultivated Editorial | Selected | User |
| Voice V1, Palette C2, Type T2, Grid G3, Motion M1 | Selected | User |
| Iconography I1 Field Notes | Selected | User |
| Homepage H1 Harvest to Home + PDFs | Selected | User |
| Wordmark and logo direction | Deferred | User |
| Package release state | Proposed pending finalization | User |
| Agency-wide archive or cross-project reuse | Not authorized | User |

### Versioning

Never silently overwrite an approved system. Record changes, preserve decisions and keep tokens synchronized with Markdown, artifacts and PDFs.

### Open operational inputs

Service areas, slots, catalogue, claims, licences, taxes, restaurant terms, hosting and provider configuration remain outside this design release.

# Evidence and provenance.

Web sources were accessed on 02 October 2026. Full normalized evidence cards, confidence and limitations remain in project memory.

## Font and asset provenance

LICENSING

| Asset | Status | Requirement |
|---|---|---|
| Fraunces and DM Sans | SIL Open Font License notices included | Preserve notices with redistributed font files |
| Newsreader and Manrope | SIL Open Font License notices included | Alternative pairing only |
| I1 Field Notes icons | Original project SVG system | Extend through documented construction rules |
| Product specimen photographs | Inherited project assets; rights not independently verified | Document permission or replace before public release |

## Change history

CURRENT PACKAGE

| | |
|---|---|
| v1.0.0 | Cultivated Editorial selected; C2, T2 and G3 approved. |
| v1.1.0 | I1 Field Notes selected; SVG library and icon tokens added. |
| v1.2.0-proposed | V1 and M1 approved; component system reviewed; H1 prototype and delivery PDFs added. |

**Release note**

This manual is proposed until the Design Decision Leader confirms final release status. Agency-wide archival and cross-project reuse remain separate, unapproved decisions.
