WEGROWEEN HOMEPAGE DIRECTION

Harvest to *Home.*

One continuous, high-fidelity homepage for premium household shopping, with a deliberate supply path for restaurants.

The following page is the complete desktop homepage – now grounded in the current WeGroween catalogue, project photography, WhatsApp support channel and Instagram presence. Prices, pack sizes and delivery rules remain illustrative until confirmed.

PROTOTYPE READING GUIDE

01 **Discover**
See what is ready, where it can be delivered and why it is worth choosing.

02 **Shop**
Compare current products with variety, timing, pack and price kept together.

03 **Trust**
Understand cultivation, handling and the path from harvest to doorstep.

04 **Extend**
Move into subscriptions, restaurant supply and useful seasonal guidance.

Current catalogue: mushrooms, microgreens and pairings

DELIVERY CHECK

Know we can reach you before building a basket.

Enter your six-digit pincode for the next available delivery window.

Delivery pincode

6-digit pincode **Check availability**

● Illustrative state – service areas and delivery rules require confirmation.

02 – SHOP BY KITCHEN NEED

A considered market, not an endless aisle.

Categories are organised around ingredient character and use, while still naming the product honestly.

FRESH FINISH

Microgreens

Peppery, mild and aromatic varieties for everyday plates.

Shop microgreens →

SAVOURY DEPTH

Mushrooms

Distinct varieties with texture, handling and cooking notes.

Shop mushrooms →

SEASONAL STAPLES

Vegetables and fruit

Organically grown produce selected for flavour and timing.

Shop produce →

CURIOUS INGREDIENTS

Farm discoveries

Limited cultivars and unusual products with clear guidance.

Explore the uncommon →

Microgreen growing racks Current workspace image – operational details to be confirmed

03 – CULTIVATION JOURNAL

Good produce earns trust through specifics.

The existing photography can show a real growing context. Launch copy should add only verified variety, harvest, handling and best-use information.

01 **Name the variety**
Blue-grey oyster is more useful than a generic mushroom label.

02 **Show the harvest window**
Ready, growing, limited and resting are honest operating states.

03 **Explain the handling**
Pack date, storage and best-use notes travel with the order.

Read this week's cultivation notes →

04 – FROM HARVEST TO HOME

A short path, explained before checkout.

Delivery information is part of the shopping experience, not a policy discovered after payment.

1
Check your area

Confirm the next delivery window before choosing perishable produce.

2
Choose what is ready

See harvest status, pack size and timing on the product itself.

3
We pack with context

Storage and use notes help the product arrive with fewer unknowns.

4
Receive your harvest

Track the delivery and know whom to contact if something is wrong.

Designed around local freshness Service areas, order cut-offs and delivery days should remain explicit and editable as operations grow. **Read delivery guidance →**

THE HOUSEHOLD EDIT

Curated pairings already exist in the catalogue.

The current source includes a Stir-Fry Specialist, Gourmet Salad Kit, Umami Power Pack and Chef's Signature Box. This module turns that existing range into a clearer household shopping proposition.

- Button mushrooms + pea shoots
- Assorted fungi + broccoli microgreens
- Oyster mushrooms + radish greens
- Full seasonal sampler concept

05 – FOR PROFESSIONAL KITCHENS

Specialty produce with a direct supply conversation.

Restaurants, cafes and chefs can request current availability, kitchen pack sizes and recurring supply without changing the household-first shopping journey.

Kitchen-ready list
Variety, unit, lead time and indicative volume.

Recurring requirements
A practical path for planned weekly needs.

Business support
Clear order records and one supply contact.

HARVEST NOTE

Email address **Join the note**

RESPONSIVE CONTINUITY

The same story, *made compact.*

On smaller screens, the hierarchy stays intact: promise, delivery context, current harvest, cultivation proof, then the restaurant path.

01 **Priority remains visible**
Household shopping and delivery lead every viewport.

02 **Cards become summaries**
Availability, unit and price stay visible without horizontal scrolling.

03 **Trust stays near action**
Pincode, harvest and handling information do not move into hidden policy pages.
